Our company was founded as a sole proprietorship in 1993. Back then, we almost only specialised in the implementation of building services engineering systems. The number of orders and the rate of production necessitated the expansion of the initial staff. The business was turned into a limited liability company in 1996.

Having earned the trust of our customers by providing them with skilled labour, today we also perform technological installation work, maintenance and repairs.

Company: HI Épületgépész KFT
Address, registered office: 9200 Mosonmagyaróvár, Alkotmány u. 3/A/2.
